

Internationale Arbeitsgemeinschaft für Futtermitteluntersuchung (IAG)
Sektion Futtermittelmikroskopie
International Association of Feedstuff Analysis (IAG)
-Section Microscopy

Meeting 2004
Hamburg 29.09. – 30.09.2004

- 1) Discussion of ring test- "Ergot in mixed feedstuffs" and "Ergot in cereals"
Decision: No estimation in the fine fraction (< 0,5mm) and only reporting the amount in the fractions above 0,5mm
- 2) Discussion about the revision of the VdLUFA – microscopy – methods, which are based on the decided IAG methods. This revision is necessary because of particular rules of VdLUFA.
- 3) IAG Flyer and presentation of IAG microscopy group in internet:
Prof. Hahn is intending to finance booklets with our IAG methods or one edition of our flyer.
The flyer will be presented in a final version on the meeting in Wageningen 2005.
- 4) Training workshops: Ana Boix informed about scheduled workshops on the Stratfeed protocol for the former memberstates to identify animal ingredients in feedstuffs.
- 5) Open declaration:
Lectures on tolerances in the percentual estimation of constituents were hold by Egert (D) and Frick (CH)
- 6) The method " Determination of mites and other infestations in feedstuffs" was read in first version.

Secretary:

President:

Dr. Wernitznig

Dr. Paradies-Severin
