

**Internationale Arbeitsgemeinschaft für Futtermitteluntersuchung (IAG)  
Sektion Futtermittelmikroskopie  
International Association of Feedingstuff Analysis (IAG)  
-Section Feedingstuff Microscopy**

**Meeting 2007  
Hamburg 26.09.2007**

**1: Methods:**

- first reading of method for determination of *Ambrosia artimisiifolia* L in non pelleted animal feedingstuff.
- Last review of the method "Sample preparation for the determination of bone fragments in sewage sludge, compost and soil".

**2: Animal Ingredients:**

a) Presentation of a new proposal for a counting method used for quantification of animal constituents in feedingstuff.(PASCAL VEYS/CRL – GEMBLOUX)

b) Discussion on the advantages and disadvantages of the use of "Microscopy" and "PCR" in order to detect animal proteins in feedingstuff.

**3. Flyer and internet:**

- An IAG-Poster, based on the layout of the flyer, was accepted for presentation on the SAFEED-meeting in Namur.

**4. Lectures:**

- Checking for seeds of *Ambrosia artemisifolia* L in bird feed: Comparison of results for 2005 and 2006 (GENEVIEVE FRICK/CH)
